

Environmental Policy

NETCO management Services Ltd shall endeavour to support the environment by adopting a range of measures that reduce waste, save energy and support environmentally friendly approaches to resources.

These measures will include the following approaches: -

Saving Paper

- Print on both sides of the paper
- Use line spacing of no more than 1.5
- Lay out your publication with the minimum necessary white space
- Avoid using varnishes during printing
- If adhesive binding is necessary, do not use those containing chlorinated organic compounds
- Adopt e-mail and other electronic media for distribution of minutes and promotional materials and communication with the membership.

Saving Energy

- Give preference to equipment with low power stand-by or sleep features.
- Be mindful and self aware of how much energy is used by officers and reduce consumption to a practical level.

Purchasing strategy

- Seek suppliers that are working towards the phase out of non-*environmentally* friendly practices.

Transport Strategy

- Encourage car sharing at events and meetings to reduce CO2 emissions and reduce transport costs.
- Strategically locate events and meetings to reduce transport costs and fuel consumption

Resources and Equipment

- Source equipment from sustainable sources and environmentally friendly materials.
- Recycle where appropriate such consumables as e.g. paper and printer cartridges

As a contract delivery organization NETCO Management Services Ltd will take due consideration of all contract needs and additional requirements.
